## Address

---

Beirut Governorate  
Lebanon

## Summary

---

Passionate and motivated Software Developer and Senior Computer Science student with a strong interest in Native Mobile development, cross-platform React Native, and front-end frameworks.

## Work Experience

---

### **Claims Express CE Lebanon ▪ Achrafieh, Beirut Governorate, Lebanon**

#### **Software Developer**

As a React Native and Angular developer, I successfully developed and deployed a fully functional mobile application available on both the Play Store and App Store. The app includes a wide range of features, integrating various APIs to ensure seamless user experiences. I managed the entire development lifecycle, from design and implementation to testing and deployment, ensuring high performance and reliability.

In addition to the mobile app, I developed a comprehensive Angular-based dashboard and management website for the company. The dashboard includes multiple features for managing company operations, integrating backend services, and providing an intuitive user interface. Both the mobile app and the web dashboard are live and actively used, showcasing my ability to deliver real-world, production-ready solutions.

*07/2024 - Present*

## **DualCom-Consulting ▪ 1 Avenue Quobbah-Khaldeh, Lebanon**

### **Mobile Application Developer**

During my internship, I developed an Android project called NoteApp from the ground up. The app includes features such as user authentication (login), creating notes with titles, descriptions, and images, displaying notes on maps, live chat functionality between users, and the ability to send and receive notifications. I quickly adapted to the team's development processes and technologies, contributing efficiently to project goals. Throughout the project, I demonstrated proficiency in Kotlin and Android Studio, showcasing strong problem-solving skills and a keen understanding of app development.

*06/2024 – 08/2024*

## **Al Maaref University ▪ Beirut, Beirut Governorate, Lebanon**

### **Software Tester**

*06/2023 – 09/2023*

I worked as an administrative assistant for a year, and I have recently been promoted to a software tester within the IT directorate during this summer semester. In my new role, I am responsible for providing technical support, assisting with IT projects, and contributing to the overall operations of the department.

## **Al Maaref University ▪ Beirut Governorate, Lebanon**

### **Administrative Assistant**

*08/2022 – 06/2023*

Applied for a work study program at my university, assistant to the student affairs.

## **Education**

---

### **Al Maaref University**

#### **Computer Science**

*09/2021 – 07/2024*

Experienced computer science professional with a passion for learning and innovation. Constantly staying updated with the latest industry trends and technologies. Committed to lifelong learning and continuously expanding my knowledge in the field of computer science.

## TECHlarious

10/2023 – 01/2024

Skills: MongoDB · Express.js · HTML5 · React.js · Cascading Style Sheets (CSS) · Node.js · JavaScript

Mobile apps:

### Surveyor App for car accident management

Sep 10 – 2024 – Oct 3 – 2024

It's a mobile app using react native, developed for accident process for insurance company. App has many features from taking pictures, api integration, car image to click where the crash, lists and autocomplete dropdown and deployed.

## **Social Media App**

Jun 10 – 2024 – July 29 – 2024

A basic social media application is developed using native Android, leveraging Kotlin, XML, Room database, Firebase, and a Node server. Server communication is handled via a Retrofit client. The application includes features such as user profiles, posts, and a polls section for questions, and hardware access for camera, files, and location.

The app comprises multiple activities, including a feed, post details, and a Google Map with pins marking the location of each post. Additionally, it features a 1:1 online chatting service between users, implemented using Firestore. The app also incorporates user authentication, Google Sign-In, and session management to maintain user login status.

## **Stories Coffee Shop**

May 15 – 2024 – May 29 – 2024

The Stories Mobile App is a convenient and user-friendly application designed to enhance the coffee shop experience for customers in Lebanon. The Stories app offers a comprehensive mobile platform for browsing the menu, placing orders for pickup or delivery, and even.

customizing your favorite coffee creations. In addition to a feature to access the camera and add a profile picture for the app.

## **Contacts app**

Feb 6– 2024 – April 25 – 2024

Contact app is a versatile contacts management application that enhances your communication experience. Easily access your camera to add profile pictures, view each contact's location, and initiate calls directly from the app. ContactsApp keeps you connected and organized, all in one convenient platform.

Websites:

## **MaHal Coffee Shop website**

Dec 11 – 2023 – Jan 1 – 2024

Crafted with HTML/CSS/JavaScript and ASP .NET Core MVC, it offers authentication, role-based access, and a user-friendly interface. Admins manage effortlessly with the Admin Dashboard, users explore and review, while baristas curate an enticing menu.

## **Tech accessories Store website**

March 8 – 2024 – March 14 – 2024

Small management app with CRUD operations for an online tech store using SpringBoot java.
