## Profile

---

Motivated Computer Science major with a genuine curiosity for how technology can improve real-world experiences and drive impactful change. I'm passionate about exploring diverse tech areas, including data insights, user-focused solutions, and process innovation. Eager to continue learning and contribute fresh perspectives within a collaborative team environment.

## Projects

---

### Frontend Web Project

- Created a website to buy games, with a description for each game, using HTML CSS and JS.

### Python Project

- Created an online soap shop with a quick description for each soap scent, with an invoice for each purchase.

### Database Project

- Created a hotel management database with a few queries.

## Education

---

### Lebanese University (2022 – 2025)
