## EDUCATION AND TRAINING

[ 2018 – 2023 ]

### B.S. in Computer Science

*Lebanese University* <https://www.ul.edu.lb/>

**Address**: 0000, beirut, Lebanon | **Field(s) of study**: Education: • *Education not further defined*

## LANGUAGE SKILLS

**Mother tongue(s)**: Arabic

**Other language(s):**

**English**

**LISTENING C1 READING C1 WRITING C2**

**SPOKEN PRODUCTION C2 SPOKEN INTERACTION C2**

*Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user*

## **DIGITAL SKILLS**

---

### **My Digital Skills**

ASP.NET CORE Web Api | ASP.NET Core/MVC | .Net core framrwork | SQL SERVER | SQL SERVER management studio | C Programming | Blazor (wasm) | entity framework core | C# | HTML | CSS | .NET MAUI | Git | MySQL, SQL, SQLite, PostgreSQL | C#, ADO.NET, ASP.NET

## **PROJECTS**

---

### **User Portfolio (private repository)**

A portfolio with an admin panel , JWT authentication ,Where user can add their work as a card with an image and details .

(ASP.net core web API + Blazor (wasm) + bootstrap ).

### **Wallet backend (public repository)**

Simple backend for users to manage their expenses/Budgets.

Important packages used :

- EF-Core as an ORM
- FLuentValidations
- JWT Bearer Authentication

**Link:** <https://github.com/AbbasTabikh/EWallet>

### **Najh-Ali backend (private repository)**

Key features of Nahj-Ali Backend include:

1. Role-based Authentication: Users are assigned roles such as Volunteer, Finance Controller, or Admin, allowing for granular access control and security.
2. Donation Management: The application facilitates the management of donations, tracking their status, nature (including both monetary and non-monetary donations), and recipient information.
3. User Wallets: Users are provided with wallets to manage their collected donations, ensuring transparency and accountability in handling funds.
4. Notification System: Nahj-Ali Backend includes a notification system to keep users informed about important announcements, updates, and assigned tasks (notifications are sent using FireBase).
5. Administrative Panel: Administrators have access to a dedicated panel for managing users, roles, donations, assignments, announcements, and more.
6. Fluent Validation: Validation rules are enforced throughout the application using Fluent Validation, ensuring data integrity and consistency.

7. JWT Bearer Authentication: JWT tokens are used for secure authentication, providing users with access to authorized resources based on their assigned roles.
8. Nahj-Ali Backend is a comprehensive solution for organizations or individuals seeking an efficient and secure platform for managing donations, roles, and administrative tasks.
