OBJECTIVE

Detail-oriented and analytical Software Tester passionate about ensuring product quality and user satisfaction. I am seeking to leverage my expertise in manual and automated testing, bug tracking, and quality assurance processes to contribute to the delivery of high-performing, reliable software solutions. Committed to identifying system vulnerabilities, enhancing functionality, and collaborating with cross-functional teams to achieve business goals.

Education

2018 – 2023
Menoufia University

Bachelor 's Degree of
Electronic Engineering

Department: industrial electronics and control engineering

Grade: Good (70.5%)

Graduation Project: Automatic Bottle Filling and Capping Machine, which is a bottle filling, capping, and labeling machine introduced using a Programmable Logic Controller (PLC) based controller in the automation industry.
