PROFILE SUMMARY

As a dedicated fourth-year Computer and Communication Engineering student, I have a strong interest in .NET core and React.js development, aiming to use my knowledge to advance creativity and quality in web technology projects. With a strong background in computer engineering, I'm dedicated to expanding the field of software engineering and helping to create meaningful solutions.

TECHNICAL SKILL

HTML/CSS	JavaScript	.NET	React JS	Laravel	Node JS	Next JS
Tailwind CSS	C++	Java	Python	MongoDB	SQL	

EDUCATION

Bachelor of Engineering (student) Computer and Communication Engineering Concentration: Software Engineering and Networks Antonine University	2021 – present
---	-----------------------

EXPERIENCE

FRONTEND DEVELOPER, MADA DEVELOPMENT UNIT	June 2024 – September 2024
--	-----------------------------------

- Participated in Campaign Project.
- Completed front end interface using React JS:
 - Component-Based Architecture: Efficiently building reusable and maintainable components.
 - API Integration: Effective integration with RESTful APIs and handling asynchronous operations.
 - Version Control: Proficient use of Git for version control and collaboration.

FULLSTACK WEB DEVELOPER, CREOSHIFT	October 2023 – February 2024
---	-------------------------------------

- Develop full-stack applications using Laravel (Blade templating) and Next.js (Tailwind CSS).
- Manage databases (Soft Delete, model relationships) and build REST APIs with CRUD operations.
- Implement authentication with Laravel Sanctum and enforce role-based access control.
- Enhance security and performance via input sanitization, security headers, caching, and task scheduling.
- Handle emails and improve code quality with unit testing.
- Build responsive UI components using HTML, CSS, JavaScript (links, props, swiper, accordion).

CERTIFICATES

Udemy

- React – The complete Guide 2024 (Incl. React Router & Redux)
- .NET Core MVC – The Complete Guide 2024 [E-commerce] [.NET8]

LANGUAGES

Arabic, English , French(B2)
