Experience

REAL ESTATE WEBSITE

May 2023 – August 2023

- Designed and implemented a web-based application for a real estate company.
- Utilized front-end technologies including HTML, CSS, and JavaScript.
- Employed back-end technologies such as PHP and a MySQL database to handle data.
- Developed a secure user authentication system allowing clients to create accounts and log in.
- Implemented features for filtered search, viewing home locations on Google Maps, contacting agents, viewing property details, adding properties to favorites, sending tour requests to agents, and more.
- Admin functionalities included managing users, agents, and properties, creating accounts for agents, adding new admins, and more.
- Agent can post the new property.
- This project exemplifies my practical experience in web development, problem solving skills. It allowed me to apply classroom knowledge to real-world scenarios, resulting in the successful creation of a valuable digital solution for real estate company.

FRONT-END WEB DEVELOPMENT PROJECTS

Jun 2024 – September 2024

- Developed two projects focusing solely on front-end design.
- Utilized HTML, CSS, and JavaScript to create interactive and responsive websites.
- Ensured full responsiveness across different devices and screen sizes.
