I am a dedicated and motivated fourth-year Electrical and Computer Engineering student at the University of Lebanese Faculty of Engineering II, with a strong foundation in both academic knowledge and hands-on experience. My background includes diverse roles, from tutoring and childcare to customer service, each of which has enriched my skills in communication, adaptability, and problem-solving. Fluent in three languages and equipped with technical skills in programming and data management, I am eager to apply my learning and contribute meaningfully in dynamic and challenging environments. My commitment to continuous learning is evident in my involvement in extracurricular activities like the university's astronomy club, as well as online courses in science and technology.
