

Jad Amaneddine

Chouf, Lebanon | (+961) 76 759 501 | jadamaneddin@icloud.com

Summary

A dedicated and skilled Computer and Communication Engineer with a passion for leveraging technical expertise in the field. Proficient in a wide range of technical skills, including DevOps with hands-on experience in cloud computing, contributing to the successful deployment and management of cloud-based services and applications. Integrating cloud solutions, streamline deployment processes, and improve system reliability.

Work Experience

UPLO, Dubai (Remote)

DevOps Intern

April.2024 – May.2024

- Developed and executed Azure scripts to automate routine tasks, enhancing operational efficiency and reducing manual workload.
- Managed and deployed virtual machines (VMs) on Azure, ensuring optimal configuration and performance for various applications.
- Utilized AZCopy to facilitate efficient data transfers between Azure storage accounts, optimizing data migration processes.
- Designed and implemented virtual networks (Vnets) to support scalable and secure infrastructure setups.

Internet Service Provider

Electronic Zone, Bakaata, Lebanon

May.2023 – Dec.2023

- Managing and maintaining network infrastructure to ensure reliable and high-speed internet connectivity for customers.
- Installing, configuring, and troubleshooting networking equipment such as routers, switches, and modems.
- Providing technical support to customers regarding internet connectivity, network setup, and troubleshooting.

Education

Bachelor Degree in Communication and Computer Engineering

Lebanese International University, Lebanon

May.2024

Certifications & Trainings

AWS Certified Cloud Practitioner(CLF-C02)

Nov.2024

Advanced DevOps with Projects, Udemy

Oct.2024

Azure Fundamental Certification(AZ-900)

May.2024

Azure Administrator Certification(AZ-104)

May.2024

Build ECOMMERCE Website with React JS Next JS course , Udemy

May.2024

DevOps Certification, Park Innovation

Mar.2024

HTML and CSS Course Certification , Udemy

Mar.2023

Laravel PHP Course Certificate , Udemy

2024 – Present

Additional Information

Specialized Skills: Infrastructure as Code (IaC) - Continuous Integration (CI) and Continuous Deployment (CD) - Containerization (Docker, Kubernetes) - Version Control (Git) - Security Practice -Coding/Scripting - Automation Tools (e.g., Jenkins) - Orchestration (e.g., Kubernetes) - Cloud Platforms (e.g., AWS, Azure, GCP)- Monitoring and Logging Tools – azcopy – Resources Group Creation – VM Creation.
