Hani Rahif Ayach

Nabatiyeh, Beirut, Lebanon • (+961) 76611978 • hani.r.ayach@gmail.com

I am a results-driven full stack software engineer specializing in .NET technologies (ASP.NET API, ASP.NET MVC, Razor Pages) for robust backend solutions. On the frontend, I excel in JavaScript frameworks and libraries (Angular, React.JS, Vue.JS) for responsive, dynamic UIs. My development approach is rooted in Object-Oriented Programming (OOP) principles, SOLID design, and strategic use of design patterns for scalable and maintainable codebases. I leverage expertise in microservices architecture, Agile methodologies (Scrum), and DevOps practices to enhance project efficiency.

Personal Details

Nationality Lebanese **Languages** Arabic Native Language – English Intermediate Level

LinkedIn https://www.linkedin.com/in/hani-ayach-003997215 **GitHub** https://github.com/Hani-Ayach

Employment

SEPTEMBER 2023 – FEBRUARY 2025
Full Stack Software Developer | Antwork

Related Projects

Developed and maintained web applications using Vue.js: Enhanced user interfaces and improved overall user experience.

Enhanced Android applications using Java: Implemented new features and optimized existing functionalities for better performance.

Designed RESTful APIs: Developed APIs to serve both front-end web applications and mobile apps, ensuring seamless integration and data flow.

Utilized APIs in front-end and mobile applications: Integrated and optimized APIs in various projects, enhancing their functionality and usability.

Modified and designed database structures : Designed and managed database structures to ensure efficient data storage and retrieval.

Enhanced repository management: Improved and maintained code repositories to ensure version control and collaboration.

Worked on SQL Server: Ensured optimal database performance through careful design and efficient querying.

Related Technologies

Asp.net API • Asp.net MVC • Rasor Pages • SQL Server • Android Studio Using Java • HTML • CSS • Java Script • C# • Java • Vue JS • IIS • Windows Server • Google APIs • Spread Sheet API • Microsoft SQL Server • Advanced Querying • WordPress • Umbraco • Automations Tasks…

Internship

OCTOBER 2021– JUNE 2022
Full Stack Developer | Mayfadoun

SQL Server, C#, Rest API, Rabbit MQ, Angular and Asp.net API

Education

OCTOBER 2020 – JUNE 2023
Bachelor of Computer Science | Lebanese International University

3.8 GPA • Member of university's Honor Society

Certificates

OCTOBER 2024
DevOps Engineer | Simpli Learn | Certificate link

APRIL 2024
Soft Skills with Mckinsey Forward Program | Mckinsey Academy | Badge link

MARCH 2022
Angular | Online Udemy Course

Skills

Experience with Lots of Software • .Net Framework (C#) • Programming Language(C#, Java) • Relational Database (SQL Server) • Web Development • Desktop Development (WPF) • JS Frameworks and Libraries (Angular, React JS and Vue Js) • Redux • Full Stack development • OOP Principles • SOLID and Clean Coding Principles • Bootstrap • Design Patterns • Agile methodology (Scrum Framework) • Microservices • DevOps Tools • Team player • Excellent time management skills • Data analytics Respect Deadlines • Decision Maker

Some of Projects I Have Worked on

Project 1: WikiDev – Community for sharing Developers experiences

Technologies: Asp.net core, Asp.net API, Entity Framework Core Code First, User Identity, Mailing Service, JWT token, Role Base Authorization, Repository Pattern, Façade Pattern, Dependency Injection, Angular Framework, Three Layer in Front End, Bootstrap5 Angular Animation, Lazy Loading, Multiple Module.

Project 2: Car Importer: Providing special services for importing cars

Technologies: Asp.net core, Asp.net API, Entity Framework Core Code First, User Identity, JWT token, Role Base Authorization, Repository Pattern, Façade Pattern, Dependency Injection, ReactJS, Redux Thunk, Multiple Layer, React Tool Kit, React Form, Bootstrap5, Routing, Connect Redux to Components.
