Profile

I hold degrees in Computer and Communication Engineering and studied Computer Science. My recent experiences at Monty Mobile have greatly enhanced my expertise in eSIM technology and software development. I successfully collaborated with international companies such as Ooredoo, Vodafone, and Touch to improve user experiences.

At Inkript, I focus on scripts and utilize in-house applications to generate SIM cards. Additionally, I continue to work with numerous companies, including Ooredoo and Alfa, and many other companies broadening my expertise in this field. My responsibilities at Monty Mobile included managing the entire eSIM generation process, from specifications to deployment, along with Android app development emphasizing innovative barcode solutions. Utilizing tools such as DBeaver and MySQL, and providing Help Desk Support, maintained quality assurance across various SMS software platforms, reflecting our commitment to excellence and innovation in mobile technology.

Education

Computer and communication, Engineering
Lebanese International University

Jan 2019 - Mar 2023
