WORK EXPERIENCE

Technoline Technology

Full stack developer

January 2024 - Present

- Collaborated with UI/UX designers, back-end developers, and product managers to build responsive Angular applications.
- Developed scalable Angular features, fixed bugs, and optimized code efficiency.
- Created a Python tool for importing CSV and Access database data into ArangoDB.
- Integrated Angular applications with RESTful APIs for smooth front-end and back-end communication.
- Participated in Agile ceremonies, including sprint planning and daily stand-ups.
- Leveraged Docker, VirtualBox, and Portainer for development environment management.

Freelance

Development of senior project for students

January 2023 - Present

- **Full Project Development for Students:** Provided comprehensive development services for students struggling with their capstone projects.
- **Debugging and Testing:** Ensured the final project was error-free and fully operational before submission.
- **Documentation:** Prepared detailed documentation to assist students in presenting their projects.

ESA Coding Lab Bootcamp

Full Stack developer

April 2023 - September 2023

- **HTML, CSS, JavaScript, Bootstrap, SQL, and PHP (First 2 Months):** Learned front-end and back-end basics and developed a Library Management System using PHP and MySQL.
- **MERN Stack (Next 2 Months):** Learned MERN Stack and developed a Teams Tasks Management System.
- **Final Project (Last Month):** Built a full comprehensive e-Commerce website using the MERN stack.
