- SQL/MySQL

WORK EXPERIENCE

SALESFORCE DEVELOPER

Sep 2024 – Mar 2025

Soft Retail Offshore S.A.L, Lebanon

OnSite

- Training on Salesforce via Trailhead, completing multiple superbadges (Apex Specialist, LWC Specialist) and modules related to administration and development.
- Identifying, fixing, and documenting technical issues in the Holiday/PTO and Attendance components, including functional testing, debugging Apex/JavaScript code, and optimizing for Salesforce governor limits.
- Designing and maintaining Lightning Web Components (HTML, JavaScript, Apex) for leave and attendance management, integrating dynamic business logic and enhancing UX/UI.
- Implementing an attendance management module based on an Excel model, with the creation of custom objects and fields.

SOFTWARE DEVELOPER

Apr 2023 – Oct 2023

CodeSoft Systems, Canada

Remote

- Contributed to the Otlob project, showcasing adaptability and problem-solving abilities while actively participating in a C# project using the .NET Core framework to enhance software development.
- Developed RESTful APIs with .NET Core and Node.js, employing rigorous API testing methodologies using Postman and Swagger to ensure optimal performance and functionality of applications.
- Demonstrated a commitment to continuous learning and professional growth by acquiring new skills and insights, proactively tackling challenges to advance expertise in future projects.

PROJECTS

OMEGA

Jul 2024

- Developed a comprehensive Java application to manage the end-to-end process of manufacturing prototypes for household appliance companies, encapsulating project creation, task management, and cost calculation.
- Utilized Java Swing for graphical user interfaces to manage project data, simulate execution progress, and generate statistics.
- Integrated object-oriented principles, event-driven programming, generics, collections, and file I/O to validate and handle project data efficiently.

LebTours

Jul 2023

- Crafted a website with HTML, CSS, JS, PHP and SQL for Lebanon tours, including admin tools for efficient user and tour management. Implemented real-time communication, enabling customers to reserve tours and engage with guides.
- Designed admin interface for guide and tour management, empowering oversight on reservations and account details. Ensured a secure control system for project success.
- Built a dynamic platform for tour reservations and guide communication, prioritizing user-friendly controls and personalized account management. Demonstrated web development proficiency in this project.

EDUCATION

CNAM, Lebanon

2021 - Present

Bachelor of Science and Technology with a Major in Computer Science.

LANGUAGES

Arabic (Native), English (Upper-Intermediate), French (Intermediate)
