### **Computer Science**

Computer Science Expert with three years experience in making projects in programming field. A critical creative eye and an excellent understanding of code to maintain, improve, or create projects that meet client requirements.

## **SKILLS**

- Programming Languages: Java(Eclipse, NetBeans, Android Studio), C#(Asp.net core),C,C++,php
- Web Development: HTML, CSS, JavaScript
- Databases: SQL, MySQL
- Problem Solving: Strong analytical and problem-solving skills
- Algorithms and Data Structures: Proficient in implementing algorithms and data structures
- Tools: Visual Studio Code, Visual Studio, Asp.net core,IntelliJ IDEA, Eclipse,Netbeans, Android Studio...
- Operating Systems: Windows, Linux
- Having the ability to work in team.
- Handling high-pressure situations.

## **EXPERIENCE**

Projects:

1. StudentCV Information Management Web Application (ASP.NET Core)
  - Developed a dynamic web application using ASP.NET Core to manage and display CVs information.
  - Utilized C# and Razor syntax for server-side programming.
  - Used HTML and css for client-side programing.
  - Implemented features for viewing, editing, and deleting student's CVs records.
  - Utilized Entity Framework Core for database operations and data management.
  - Created interactive forms for user input with client-side validation.
  - Gained experience in full-stack development, including front-end and back-end technologies.

- Developed proficiency in C#, ASP.NET Core, Entity Framework Core, and database management. This project showcases my ability to work on a full-stack web application, handle user input, perform database operations, and create an intuitive user interface. It also highlights my skills in C# programming and web development technologies.

## 2. Ride-Hailing App

Developed a conceptual design and requirements document (Mock-up, class diagram, sequence diagram...) for a ride-hailing mobile application, addressing the client's vision for a user-friendly and efficient transportation solution. The project focused on defining key features and functionalities to meet the client's business goals.

## 3. Simple Android Apps

Gained practical experience in developing Android applications, including user interface design and basic functionality implementation. Acquired proficiency in using Android Studio and coding in Java/Kotlin for app development. Demonstrated an eagerness to learn and apply mobile app development skills in practical projects.

## 4. Organ Donation Web APP

Collaborated with a team of fellow students to develop a web application aimed at raising awareness about organ donation and facilitating donor registrations. The project was built using HTML, CSS, and JavaScript and focused on creating an informative and user-friendly platform.

# EDUCATION

- Bachelor degree in Computer Science

Lebanese University Sep 2020 – Sep 2023

# PROFESSIONAL DEVELOPMENT

Attended a seminar at AUB focused on women's contributions and opportunities in the field of Data Science. Gained insights into emerging trends, industry best practices, and the role of women in data-driven decision-making processes.

# LANGUAGES

- English
- Arabic
