Experience

Inkript | Badaro, Beirut Lebanon   *Dec 2024 – Jan 2025*
Software Development internship

- Updated and refactored Inkript's company website built using PHP CodeIgniter, improving code readability and maintainability.
- Developed a REST API with .NET 8 and integrated it into an Angular 19 frontend, ensuring efficient data handling and user-friendly form validations.

Integrated Digital Systems (IDS) | Jnah, Beirut Lebanon   *May 2024 – July 2024*
Full stack development internship

- Built an event management website using Laravel with a Filament CMS dashboard for seamless admin control and user management.
- Integrated third-party APIs to fetch world country data, enhancing functionality and user experience.

PROJECTS

E-commerce platform using Laravel framework:
- Implemented robust user authentication, social media login, and profile management.
- Designed store management, order management, and product management systems.
- Integrated live chat, and event management functionalities.
- Incorporated currency conversion with multi-currency payments and cryptocurrency support.
- Added features like chatbot integration, store follow options, and email notifications.
- Provided admin features like store oversight, password management, and insightful seller reports.

MERN Stack CRUD Application with Authentication:
- Built a MERN stack (MongoDB, Express.js, React, Node.js) application with secure user authentication using JWT and role-based access control.
- Improved user experience with a modern UI using Bootstrap and ensured data security with encryption.

LANGUAGES

- Arabic (Native), English (Fluent), French (Intermediate)
