Adam Salman

Web Developer

Web Developer creating and maintaining high-quality websites. Skilled in HTML, CSS, JavaScript, and PHP.

Work Experience

Academic Projects, Lebanese International University, Beirut

- Created and implemented software solutions that complied with industry standards.
- Created and implemented innovative and impactful projects, earning high praise from professors and peers for their originality and strong technical execution. Took a leading role in group projects by planning, designing, and implementing solutions, while promoting collaboration and maintaining effective communication with team members.
- Developed a full-stack inventory management system as part of a software engineering course using Node.js, Express, and MongoDB. Collaborated with a team of 3 students to implement user authentication and real-time data updates.

Volunteer Work

Volunteered as a tech tutor, helping high school students with coding basics, including HTML, CSS, and JavaScript, leading to improved class participation and understanding.

Research Experience

Assisted in research on machine learning algorithms for predictive analysis in financial markets. Conducted data analysis using Python and implemented algorithm prototypes.

Education

BACHELOR DEGREE IN COMPUTER SCIENCE, Lebanese International University

settembre 2021 - Presente
