OBJECTIVE

Seeking to gain practical experience in electrical system design, analysis, and implementation.

EDUCATION

- | | | |
|--------------------------|--|------------------|
| From 2018 to 2022 | Istanbul Aydin University
Master's in electrical engineering (incomplete) <ul style="list-style-type: none">• Focused on subjects such as image processing, sensors, electromagnetics, power systems.• Engaged in research and development projects, expanding technical knowledge across multiple engineering disciplines.• Participated in an entrepreneurial startup competition, working on a prototype for cashier less stores in the Middle East | Istanbul, Turkey |
| From 2013 to 2017 | Near East University
Bachelor's in electrical engineering <ul style="list-style-type: none">• Concentrated on renewable energy, electromagnetics, and control systems.• Gained foundational knowledge in circuits, power grids, and electrical safety | Nicosia, Cyprus |
| From 2010-2013. | Khalifa Bin Zayed Institute
Baccalaureate Technique in Electricity <ul style="list-style-type: none">• Completed 3 years of technical training in electrical systems and machinery, preparing for further academic studies | Saida, Lebanon |

EXPERIENCE

- | | |
|-------------------------------|---|
| From 2023 till present | Founder Kifkenna SaaS Platform <ul style="list-style-type: none">• Launched and managed "Kifkenna," a reputation and review management software tailored for local businesses in Lebanon.• Spearheaded the development, design, and deployment process, delivering a user-friendly platform to help businesses monitor and improve their online presence. |
| From 2022 till present | Founder Synan Web Solutions LLC <ul style="list-style-type: none">• Launched a custom web development company, delivering digital solutions tailored to client needs. |

- Managed projects from inception to delivery, scaling operations through effective outsourcing and project management.
- Gained expertise in marketing strategies, client acquisition, and business leadership.
- Developed proficiency in various web technologies while leading diverse, high-impact projects.

From 2017 till present

Electrical Engineering Consultant | Freelance

- Provided consultancy on complex engineering projects across disciplines including renewable energy, IoT, and power systems.
- Applied coding skills to enhance system operations and automate processes, creating more efficient engineering solutions.
- Specialized in low-power systems, wireless communication, and electric vehicle infrastructure design.

From 2020

ERP Consultant | Water Bottling Facility

Niamey, Niger

- Led the development and implementation of an ERP solution for a water bottling facility.
- Worked closely with management to integrate inventory, production, and financial data into a unified system.
- Successfully navigated challenges related to infrastructure, team training, and system adaptation in a developing market.

From 2019 till 2020

Sales Associate | Real Estate

Istanbul, Turkey

- Generated over \$1,000,000 in sales within 8 months by applying strong relationship-building and sales psychology skills.
- Collaborated with a high-performing sales team, refining negotiation strategies and enhancing client engagement.
- Developed marketing content and advertisements using Photoshop and digital tools, driving client interest and conversions.

In Summer 2015

Summer Training | Staunch Machinery

Saida, Lebanon

- Gained hands-on experience in the design and assembly of electric boards for power generators.
- Collaborated with the team to understand and implement custom electrical solutions tailored to client requirements.
- Enhanced knowledge of power generation systems and industrial electrical engineering practices.

SUMMARY SKILLS

Languages: Fluent in English, Arabic, decent in Turkish with basic knowledge in French.

Electrical Engineering: Power systems, solar and renewable energy, electromagnetics, low-power systems, image processing, IoT, sensors, electric vehicles, and machinery.

Web Development: HTML, CSS, JavaScript, WordPress, e-commerce, UX/UI design, and responsive development.

Sales & Marketing: Client relations, negotiation, sales strategy, Photoshop, digital marketing, ad creation, and testing.

ERP Systems: ERP development, system integration, inventory management, production workflows, and financial systems.

Project Management: Business strategy, outsourcing, leadership, client engagement, and cross-cultural communication.
