French	● ● ● ● ●		

## Projects

### Java developer

*Freelance*

Contributed to a collaborative team project at Omega Company, where we developed a prototype application that simulated development costs, timelines, and staffing requirements. Together, we successfully created a valuable tool for project planning and resource allocation.

### Full stack web developer

*Freelance*

- Designed user-friendly website.
- programmed interactive features (search and posting) .
- debugged to ensure smooth website functionality.
