Architect

PROFESSIONAL EXPERIENCES

Sep 2024 - Pres Design Architect – L'Artquitecte - Beirut

Worked on multiple projects designs, ranging from residential to entertainment facilities.

- Collaborated with teams to develop cohesive designs, focusing on functionality and aesthetics.
- Utilized software like Lumion and AutoCAD for rendering and technical drawings.
- Residential building in Faqra: Designed a five duplex building, with emphasis on volume, materiality and functionality.
- EPIC Playground in Cornet Chehwan: Conceptualized and designed a rainbow-themed playground.

June 2023 - Pres Interior Architect – Cheen Lb. – Beirut

Completed over 15 projects, including residential, office, clinic, and entrance renovations.

- Delivered mood boards, tailored designs and 3D renderings using SketchUp, Lumion, and 3DsMax/VRay.
- Finalized BOQs, shop drawings, and provided support to project managers for contractor inquiries.

Sep 2022 – May 2023 Urban Designer and Researcher – Arab Center for Architecture (ACA)

- Beirut Port Rehabilitation Study: Launched by the ACA in collaboration with the OEA, Beirut Urban Declaration, Beirut Urban Lab and Public Works Studio.
 - Designed projects that fit the port's cultural and architectural context and conducted site surveys, delivered case reports, and shared insights with the team.
 - Analyzed data on demographics, transportation, and systems to identify development opportunities.
 - Worked with stakeholders to ensure designs met community needs.
 - Presented research and proposals to the Order of Engineers and public organizations.

Nov - Dec 2021 Architect Intern - Architects Group - Beirut

- Villa and Landscape design in Kherbet Anafar: Managed the villa and landscape project from concept development to detailed design and 3D rendering.

Sep 2020 - Jan 2021 Architect Restorer – Beirut Built heritage Rescue

- Under the supervision of the Ministry of Culture, UNESCO and ICCROM.
 - Coordinated roofing material orders, ensuring project compliance.
 - Assessed roofing needs and material quantities through on-site surveys.
 - Supervised installation teams, ensuring safety and quality standards.
- Sagesse College and Afeiche Building in Gemmayzeh: Studied building plans and facades to document architectural styles and construction techniques, creating plans, elevations, and detailed sections.
