SUMMARY

Looking for a challenging role in your company, where I can utilize my relevant skills and qualifications mentioned below to contribute to the success of your organization, while continuously expanding my knowledge and professional growth. I am enthusiastic and excited about trying my theoretical knowledge and applying it to real-world scenarios

PROFESSIONAL EXPERIENCE

Service Desk (Analyst), ServeIT | Zouk Mosbeh, Lebanon

June 2024-October 2024

- Researched, tested and implemented a DAM (Digital Asset Management) system on a Linux Cloud VM (Virtual Machine) for a client contracted with the company. All that through a VPN (Virtual Private Network) while using Docker technology with Terminal Commands (Bash).
- Managed the Research, Documentation and Reporting processes such as about Google Workspace implementation and management, WSUS and alternatives...
- Tested TTFs (TrueType Fonts) on Windows.

Intern, Ogero | Mina, Lebanon

August 2024-October 2024

- Learned about their Telephony Infrastructure, components in their Racks and how they collaborate and communicate, Switching, CNDs (Computer Network Defense) and Telephony Protocols (such as MIC ...).
- Gained knowledge about Transmission in depth: like street underground ogero cables, components in between such as multiplexers, demultiplexers, repeaters ...; Microwave Radio planning and implementation; updating the Headquarters Racks to use Fiber Optic new infrastructure; Equipment used for reparation of all of the above.
- Familiarized with almost all Commands used in daily tasks with customers.

IT Intern (Help desk), Netways | Beirut, Lebanon

July 2023 – August 2023

- Learned about premise AD DS (Active Directory Domain Service) implementation, management of Users, Machines and GPOs (Group Policy Objects). Sync it with office 365.
- Gained knowledge on how to set up a Hybrid environment with an IaaS (Infrastructure as a Service) provider like Azure. Learned Azure Management of resources, roles, application groups, log analytics.
- Acquired skills on how to set up a Lab environment for AD DS testing; with a Local VM (Virtual Machine), adding Machines, virtual users, admins, groups, GPOs; Use of PDQs for fast file sharing to user machines. Use of Remote Desktop Apps. Manage server roles features, services.
- Worked with outlook customizations.
- Learned Microsoft admin center, Mail Flow Rules.

Student Work, UOB (University of Balamand) | Beaino, Lebanon

January 2022 – December 2024

- Medals and Certificates for leading two school teams in a Python Programing Competition (yearly event). Successfully lead them in training and strategies, which got us last year in 2nd and 4th places.
- Be responsible for fixing any errors or problems in the Python Programing Competition

- Monitored lab rooms for people who need help or have problems, like computer center printers, UOB account issues, retro projectors, internet connectivity problems...etc.
- Assisted Doctors in setting up Labs, reordering everything where they should be. Detected defected/harmed components, and fixed them.
