
SUMMARY

Frontend developer focused on building responsive applications using modern technologies like Angular and React. Dedicated to crafting clean, maintainable code and enhancing user experience through intuitive design and efficient UI development.

EDUCATION

American University of Beirut (AUB), Beirut, Lebanon
Bachelor's degree in computer science

September 2021 – June 2024

EXPERIENCE

Zero & one, Beirut, Lebanon

Software Developer Intern

July 2024 – September 2024

- Worked extensively with AWS services including IAM, Cognito, S3, RDS, and more.
- Developed frontend applications using React Framework with Vite for fast and optimized builds.
- Worked with SQL databases for effective data management and querying.
- Trained in Git for version control, ensuring efficient project collaboration and code management.
- Used **Click Up** for project management, tracking tasks, and ensuring smooth team collaboration.

ITXI, Beirut, Lebanon

Frontend Developer

December 2024 – February 2025

- Built responsive Angular apps using Angular Material for consistent UI design.
- Worked with NgRx to handle complex state management efficiently.
- Improved testing skills with Jasmine for reliable unit and end-to-end tests.
- Used Bitbucket for version control, ensuring organized and trackable code changes.
- Managed tasks with JIRA to efficiently monitor and report development progress.

FURSAN&, Dubai (Remote)

Frontend Developer - Part Time

February 2025– Present

- Developing frontend applications using React Framework.
- Working with AWS services including Cognito, S3, and Cloud Front.
- Integrating RESTful APIs to fetch and display dynamic data on the frontend.
- Using Git for version control, ensuring organized and trackable code changes.

PROJECTS

ProOrder Purchase System

- Developed a web-based system to streamline order creation, authorization, and management within an organization.
- Built the frontend using React.js with TypeScript and Material UI (MUI) libraries for a modern and responsive user interface.
- Designed and implemented a serverless backend using Node.js with TypeScript, integrated with AWS services including AWS RDS (MySQL) for database management.
- Integrated AWS Cognito for secure user authentication and authorization.

ITXI-HR Management System

- Created detailed **documentation** for each page, including overviews, **unit testing**, and **end-to-end (E2E) test** plans.
- Developed the frontend using the **Angular** framework and **Angular Material** for UI components.
- Implemented **state management** using **NgRx** to handle application state in a scalable and maintainable way
- Wrote and executed tests using the **Jasmine** testing framework to ensure application reliability.
- Utilized **Bitbucket** for version control and team collaboration.

IMDB Cloning

- Collaborated with a team of 3 to develop a comprehensive movie database platform replicating key functionalities of IMDB.
- Built dynamic movie databases, cast and crew details, and user reviews using React for the frontend.
- Integrated Firebase for real-time data synchronization and MongoDB for backend database management.

CERTIFICATIONS

- AWS Partner: Containers on AWS (Technical), Migrating to AWS (Technical), Cloud Economics, Security Governance at Scale (Technical)

OTHER SKILLS AND INTERESTS

Languages: English (Full professional proficiency), Arabic (native)

Technical Skills: JAVA, HTML, CSS, JavaScript, TypeScript, Node.js, React, MySQL, Git, GitHub, Bitbucket, Confluence, Jira, Angular Visual Studio, IntelliJ.
