Big Data | Cloud Native | Data Centers | Cybersecurity | Fullstack |  
Project Management

Atlanta Metropolitan Area

## Summary

Whether it's creating software that improves my team's workflow or helping someone fix a technical issue, I find it fulfilling to use computers to help people in meaningful ways. I'm always looking for new ways to use technology to help people and new technologies to democratize information. Information yearns to be free.

## Experience

### KnownHost

Critical Operations Engineer, Data Center

November 2024 - Present (6 months)

Atlanta, Georgia, United States

The Atlanta data center serves the majority of our clients in the Western Hemisphere, featuring redundant links with a capacity exceeding 20G symmetric. I am actively engaged in the management and maintenance of over 200 rack units distributed across more than 40 cabinets.

### Verotech Professional Services

IaC / DevOps Engineer

January 2023 - November 2024 (1 year 11 months)

Helping clients to provision scalable, secure, and reproducible systems.

Deliverables included: IaC, system design docs, and white-glove service. Total compensation package: the clients' smiles and laughs.

### Zesty.io

Operations Engineer

September 2022 - November 2022 (3 months)

Zesty.io offers a hybrid-headless CMS platform which simplifies web content creation and distribution. My responsibility was to monitor and maintain Zesty.io's cloud infrastructure.

## Travelers

## Technology Engineer

September 2020 - September 2022 (2 years 1 month)

Alpharetta, Georgia, United States

Travelers is a personal, business, and specialty insurance company serving clients worldwide. To

advance and augment their capabilities I assisted in the development of cloud infrastructure.

## CoreXpand

### Cloud Engineer

November 2019 - September 2020 (11 months)

Norcross, Georgia, United States

www.coreexpand.com is a B2B e-commerce solution provider. Much of CoreXpand's infrastructure lives in the cloud—supplying customers with reliable and convenient e-commerce solutions. I assisted with the monitoring and provision of cloud resources such as Windows and Linux EC2 instances, Route53 (DNS Management), AWS Certificate Management, AWS Simple Storage Service(S3), and AWS EBS and EBS Volume Snapshots

## Georgia State University

### Research Assistant

2015 - 2017 (2 years)

---

## Education

### Georgia State University

Bachelor's degree, Physics · (2013 - 2017)
