Objective

Detail-oriented software developer with a strong foundation in business computing, experience in Java, Spring Boot, React, JavaScript, MySQL and PostgreSQL. Proficient in developing, and optimising software solutions. A motivated and adaptable worker skilled at communication and problem-solving seeking to leverage my skills.

Project Experience

Automated Inventory Management System | Java, Firebase

2024

- Developed an Android-based (AIMS) to streamline inventory processes, reduce manual errors, and enhance stock accuracy.
- Implemented core features, including user authentication, product and order management, and real-time low-stock notifications to improve inventory control.
- Utilized Java, Android Studio, and Firebase (Real-time Database and Storage) for backend functionality, ensuring real-time data synchronization and secure image storage.
- Enhanced business efficiency by automating routine tasks, reducing operational costs, and enabling better decision-making with real-time data insights.

Photographer's Portfolio | Html, CSS, JavaScript, PHP, MySQL

2024

- Developed a dynamic and user-friendly portfolio website for a photographer to showcase their work and manage their online presence.
- Responsive design for an optimal viewing experience on all devices.
- Photo gallery showcasing the photographer's work with category.
- Contact form for users to send inquiries or schedule appointments.

E-Commerce | React, Tailwind, Spring Boot, PostgreSQL

2025

- Developed a full-stack E-commerce web application using React and Tailwind CSS for a responsive and modern UI.
- Built RESTful APIs with Spring Boot and managed data persistence using PostgreSQL.
- Implemented secure user authentication and authorization using JWT and Spring Security.
- Created robust product management shopping cart, and order processing features.

Education

Lebanon University, Faculty of Economics and Business Administration

Major: Business Computer | Minor: Management

Skills & abilities

- **Strongest Area:** Data Structure , Algorithms
- **Programming Language:** Java, JavaScript, PHP
- **Libraries/Frameworks:** Spring Boot, Reactjs, Nextjs, Html5, CSS3, TailwindCSS, Docker, Git
- **Database:** MySQL, PostgreSQL, SQLite, Firebase
- **Problem solving:** solimanDev (LeetCode)
