OBJECTIVE

Recent university graduate with a major in Computer Science. Seeking to leverage my 3+ years' programming skills as a software engineer. I will be available for 40-hour workweek, and able to work with a flexible schedule.

SKILLS

Programming languages and Frameworks

HTML/CSS, Java, Python,
JavaScript, ReactJS, Django,
SQL, Bootstrap, Git, MATLAB

Communication and interpersonal

Effective communicator
Eager to learn
Problem solver and time efficient

EDUCATION

American University of Beirut | *Bachelor of science*

Beirut | **08.2021 – 12.2024**

- Major in Computer Science
- Coursework : Introduction and intermediate programming with Java, Data structures and algorithms, Database systems, Data science, Machine Learning, Operating systems, Numerical computing

EXPERIENCE

CNRS GEOAI | *Software Engineer internship*

Beirut | **05.2024 – 08.2024**

- Independently developed and enhanced a web application for monitoring water volume in Qaraaoun reservoir using satellite imagery.
- Adopted an agile workflow for quick and efficient deployments using React.js to revamp the user interface and Python for backend processes while ensuring seamless integration.
- Commended for updating and improving the user interface in addition to the model's segmentation accuracy.

PROJECTS

Social Kitchen

Social media platform for recipe sharing.

Ishtaki (Capstone project)

Data visualization platform for corruption reports statistics and geographic correspondence.
