## Summary

I'm a Junior Web Developer with a strong background in HTML, CSS, JavaScript, and PHP, along with some experience in the Laravel framework. I recently graduated with a degree in Computer Science and currently work as an IT Specialist, which has given me valuable technical experience and problem-solving skills. I've worked on a few projects like a Laravel-based senior project, a calculator, and a weather app, and I'm excited to dive deeper into web development and continue learning while contributing to projects that create great user experiences.

---

## Experience

### IT Specialist

Feb 2025 – Present

- Provide IT support for internal systems, troubleshooting hardware and software issues for employees.
  - Assist with network management, including configuring switches and routers, and supporting DHCP.
