SUMMARY

I'm a 19 years old Data Science Student at USAL. I have practical experience with Java, Python, and web development. Right now, I am a Data Science intern at XpertBot and also represent Zaker as an Ambassador. I have done many projects, worked in teams, and practiced technical talking. I've also developed customer service and organizational skills through retail work. In addition, I manage a small YouTube channel and have experience with photo and video editing using Adobe tools. I'm eager to use my skills in real world places.

- Building foundational understanding of data science methodologies and applications
- Preparing for upcoming projects in data cleaning, exploratory analysis, and basic dashboard creation

Brand Ambassador | Zaker | Remote

February 2025 - Present

- Developed and monetized technical study guides, generating additional revenue stream
- Organize and participate in ambassador meetings to present on specialized topics
- Managed webinar logistics including speaker coordination and scheduling
- Authored educational materials including technical notes and comprehensive summaries
- Develop social media content to increase platform visibility and student engagement
- Collaborated in strategic planning sessions to provide feedback on platform improvements and preview upcoming features

Shop Assistant | El Harake Tools | Beirut, Lebanon

April 2024 - September 2024

- Improved sales by helping customers find the right tools and suggesting related products
- Created attractive product displays that increased visibility and customer interest
- Managed inventory by tracking popular items and ensuring timely restocking
- Gained experience in basic pricing strategies and promotional techniques

Content Creator | Independent YouTube Channel | Remote

April 2020 - June 2023

- Built and grew a gaming channel to 25,000+ subscribers while maintaining academic excellence
- Developed methodology to predict virtual item shop rotations based on historical release patterns
- Produced professional quality videos using Adobe Premiere Pro and created custom thumbnails with Photoshop
- Successfully monetized channel through consistent content delivery and audience engagement strategies

PROJECTS

Gym Website - Frontend Development

Technologies Used: HTML, CSS, JavaScript

- Developed a captivating homepage that draws visitors in and inspires them to take action.
- Crafted an intuitive navigation system for easy access to workouts, memberships, and services, ensuring a seamless experience.
- Designed responsive layouts to guarantee a smooth and consistent experience across all devices.
- Improved user interaction with clear, well-placed call-to-action buttons and a simple, user-friendly interface.
- Collaborated with the team to refine the site's visual appeal, functionality, and accessibility, making sure it's enjoyable for everyone.
- Check out the live site here: [HYH Gym Website](#)
