EXPERIENCE

Data Engineering Intern – *SocialLab (Hybrid)*
Aug 2024 – Oct 2024

- Built scalable ETL pipelines using Python and Google Cloud Platform (GCP).
- Designed interactive dashboards with Flask, amCharts, HTML/CSS, and JavaScript.
- Processed and cleaned web-scraped data using BeautifulSoup, Requests, and Pandas.
- Developed secure APIs and endpoints for real-time data tracking and analytics.

Full Stack Developer Intern – *Vanrise (Remote)*
Aug 2024 – Sep 2024

- Created a full-stack device management system using AngularJS and ASP.NET.
- Developed RESTful APIs in C#; managed backend with SQL Server.
- Built dynamic forms with filters, validations, and reporting features.
- Applied custom AngularJS directives and implemented security measures.
