📅 17 August 2005    🇱🇧 Lebanese    🔗 [linkedin.com/in/ryan-hamze-409310231](https://www.linkedin.com/in/ryan-hamze-409310231)

## Education

<b>Computer Engineering</b> , Antonine university	2024 – present
<b>Baccalaureate Ls</b> , BIC	2023 – 2024 Beirut, Lebanon

## Professional Experience

<b>Programmer</b> , Beirut 42	02/2025 – 02/2025 Beirut
-------------------------------	-----------------------------

I completed a rigorous interdisciplinary boot camp at Beirut 42 that focused on integrated approaches to coding and programming, as well as the teaching of fundamental building blocks of programming through problem-solving. There were several projects including creation of a Sudoku game and a dictionary which translates numbers into words (algorithms included), as well as alphabetic box insertion through row and column addition;  
languages: C  
I also work with Git, Vim, GCC, Make, Valgrind, GDB in the Linux Ubuntu environment along with terminal and bash systems.

## Skills

<b>C++</b>	<b>C</b>
<b>Solidworks</b>	<b>Auto Cad</b>
<b>Arduino / electronics</b> Won 3rd place in ARC (Annual Robotic Competition) in 2018 Made a crossroad signal system in Intro to engineering Course	<b>Bash</b>
<b>Linux</b>	

## Languages

• English                      • Arabic

## Projects

**Solar powered crossroad Signal**, Arduino project [🔗](#)

### Charities Donation Project

C++ system for Charities and Donations where the user enters information to make donation to a specific charity then it adds to a json file where all charities and donations and users information are stored and secured with a Hashing technique .
