Objective

To secure a promising position that offers both a challenging and a good opportunity for growth.

Mobile: +96178829827

Work Experience and Skills Developed

• Apr 2023 - present: Senior Quality Assurance at Aperture

Actively collaborating with developers and business stakeholders to clarify requirements, especially in terms of testability, consistency, and completeness.

Analyzing system requirements and developing detailed test plans for system testing.

Converting the user stories (agile methodology requirements documents) and design documentation into test design products: test scenarios, test cases. Involving in daily stand-up meetings and weekly sprint meetings to discuss workflow and project specifications.

Capturing and distributing meeting minutes and created data low, and process flow diagrams.

Participating proactively in team retrospectives, suggesting and implementing improvements.

Developing and executing automated test scripts using tools such as Selenium to ensure comprehensive test coverage and increase test efficiency. Identifying and reporting bugs and issues, working closely with the development team to resolve them, and verifying fixes through automated regression testing.

Enhancing the test automation framework to support new features and improve test stability and reliability.

• Oct 2018 - Apr 2023: Quality Assurance Supervisor at Ecomz

Responsible for testing, design, debugging, and implementation of software quality standards and procedures to maintain high levels of software quality and product reliability

Develop test plans, and other documentation for various functional and non-functional testing activities

Execute scenario-based testing on multiple platforms and devices and write bug reports

Work closely with the development team to diagnose issues, resolve defects. Ensure that product releases follow project specifications

• Jun 2016-sept 2018: Technical Support at Omega Software

Installing Oracle and Omega Software to clients

Maintaining Omega on servers, POS, computers and notebooks Daily Troubleshooting for clients

• Nov 2015-May 2016: Technical Support at ICC Sal.

Maintaining servers, computers, notebooks, printers, and scanners. Installing all programs and drivers related to computers Searching for IT information and procedures to resolve IT related issues

Assembling/disassembling PC, peripheral devices, and similar IT products

Mohamad Kais
