

Mohamad Bassam Itani

Beirut, Lebanon

+961 70 790 184 | mitani350@gmail.com

Personal Information

- **Nationality:** Lebanese
- **Languages:** Arabic (Native Language), English (advanced proficiency)

Education

Bachelor of Computer Science | Beirut Arab University

JULY 2015 – DEC 2018

Experience

Senior Full Stack Software Engineer (.Net and Vue.js) | Acksession LLC
Beirut, Lebanon

SEP 2023– CURRENT

Responsibilities:

- Build and maintain robust backend services using ASP.NET Core, Entity Framework Core, and SQL Server, ensuring efficient data storage and retrieval.
- Design and implement RESTful APIs, enabling seamless communication between frontend and backend systems.
- Conduct thorough code reviews, providing constructive feedback and mentorship to junior developers, promoting best coding practices.
- Integrate third-party services and APIs, enhancing application functionality and improving user experience.
- Expert with concepts of MVC, entity framework core, ado.net and RESTful
- Knowledge in event-driven architecture (RabbitMQ)
- Creating Authorization/Authentication using JWT and OAuth2.
- Working with markup languages such as JSON and YML
- test-driven and agile development
- Writing test cases to verify design requirements are being met using xunit.
- Identifying and finding solutions to bugs.
- Develop and maintain dynamic, responsive single-page applications (SPAs) using Vue.js 2, Vue Router, and Vuex.
- Create reusable and modular Vue.js components, ensuring maintainability and scalability of the frontend codebase.
- Work closely with UX/UI designers to translate design mockups into interactive, responsive web interfaces.
- Integrating with back-end APIs and data services to retrieve and update data.

Full stack Software Engineer (Spring boot, .net core and Angular) | Siren Analytics
2021– SEP 2023
Beirut, Lebanon

SEP

Responsibilities:

- Designing and implementing microservices which uses the spring boot framework or .net core.
- Expert with concepts of MVC, entity framework core, ado.net, JDBC, JPA, and RESTful
- Creating database schemas and flyway scripts that represent and support business processes
- Knowledge in event-driven architecture (RabbitMQ)
- Creating Authorization/Authentication using JWT and OAuth2.
- Working with markup languages such as JSON and YML
- Knowledge in Docker file, Docker images and docker-compose
- Knowledge in test-driven and agile development
- Writing test cases to verify design requirements are being met using xunit, Junit and Mockito.
- Working in compliance with the full Software Development Life Cycle.
- Identifying and finding solutions to bugs.
- Create well written documentation (BRDs) for the individual microservices.
- Implementing front-end functionalities using Angular features like components, services, directives, and pipes.
- Integrating with back-end APIs and data services to retrieve and update data.

Full stack Software Engineer | intalio-EverTeamGs
Naccach, Lebanon

DEC 2020– SEP 2021

Responsibilities:

- Gathering information and requirements
- Participate in requirements analysis
- Collaborate with internal team to produce software design and architecture
- Write clean, scalable code using .NET programming language
- Test and deploy applications and systems
- Revise, update, refactor and debug code
- Improve existing software
- Write documentation throughout the software development life cycle (SDLC)
- Serve as an expert on applications and provide technical support

Junior Software Engineer, .Net Backend Developer | Middleware Data Systems (an ITG Company) JUNE
2019 –DEC 2020
Beirut, Lebanon

Responsibilities:

- Gathering information and requirements
- Translating business requirements into technical requirements
- Consultation and providing best practice applications
- Customizing Entities, Design custom Entities and Activities
- Develop custom MSCRM plugins and Activities
- Form customizations and create client-side extensions using JavaScript

- Develop Web services and APIS (Rest/Soap)
- Create SSRS/Power bi reports for sales and financial data using joins tables.
- Develop Data migration tools using .NET framework
- Develop console applications and ASP.net Pages
- Deploy custom solutions on the client side
- Train the clients on the new deployed solutions
- Troubleshoot, test, debug and fix MSCRM application errors
- Documentation and reporting

Skills

- Languages/technologies: Java Spring boot, .net framework and core, Angular, MVC, Microservices, event-driver, Rest/Soap API, JavaScript, CSS, jQuery, HTML5, PostgreSQL, MS SQL and XML
- Development/Reporting Tools: IntelliJ, Visual studio (2010, 2015 & 2019), Team foundation server, git, SSRS and power bi

Certificates
