# ALI YAZBEK

Entry-Level Full-Stack

📞 +96181994663   @ Ali55Yazbeck@gmail.com   📍 Beirut, Lebanon

EXPERIENCE

Full-Stack Developer Intern, IT Software Department

Lebanese international university

📅 05/2025 - 08/2025   📍 Beirut, Lebanon

- Contributed to the development of a University Document Management System (DMS) to streamline student, instructor, Staff, and HR workflows across departments
- Software Problem solving and handling work
- Helped build secure features like blockchain audit logs, dynamic watermarking, role-based access control (RBAC), and OCR Document intelligent Scan
- Integrated frontend with backend services built in PHP and MySQL, using RESTful APIs

IT (Command & Technical Support) Intern

Amusement Parks

📅 04/2020 - 05/2021   📍 Jeddah, Saudi Arabia

- System Configuration and Support, including diagnosing and resolving software and hardware POS, ticketing, and management systems
- Software Troubleshooting and Fixes: Assisted in identifying and resolving technical glitches affecting amusement
- Used CLI tools (ping, tracert, ipconfig, nslookup, netstat) to configure and troubleshoot network connections.

EDUCATION

Bachelor of Science in Computer Science

Lebanese international university

📅 2021 - 2025   📍 Beirut , Lebanon

- Completed core coursework in OOP (Java/C#), Data Structures & Algorithms, Database
- Systems (MySQL/SQL Server), Software Engineering, and Web/Mobile Development
- Capstone internship: designed and implemented a React + PHP/MySQL Document
- Management System with AI-OCR integration, blockchain audit trails, dynamic
- Watermarking, and role-based access
- Built a real-time Flutter/Dart quiz app as a hands-on project, honing UI state management
- And RESTful API integration
- Earned IBM-backed certifications in Software Engineering, System Architecture, and SQL
- Database Management
- Actively expanded skills through Udemy courses on React and modern web technologies

SUMMARY

ENTRY-LEVEL FULL-STACK DEVELOPER Computer Science graduate with post-graduation software development experience. Solid foundation in object-oriented programming (Java) and core data structures. Proficient across full-stack technologies-PHP, HTML/CSS, JavaScript (React), Flutter/Dart, Java, and C#-and experienced in game development and robotics to enhance creative problem solving. Currently interning as a Full-Stack Developer at Lebanese International University (selected among the top 10 candidates), contributing to real-world React+ PHP/MySQL projects. Continuously upskilling through Udemy courses in modern web technologies and IBM-backed certifications in software engineering, system architecture, and SQL database management. Eager to leverage adaptability, passion for technology, and a growth mindset in a forward-thinking development team.

PROJECTS

University Document Management System (DMS)

📅 05/2025   📍 Beirut, Lebanon

Summary

- Developed web interfaces using React.js for dashboards, document uploads, and request tracking portals.
- Helped build secure features like blockchain audit logs, dynamic watermarking, and role-based access control (RBAC).
- Worked on mobile-responsive UI, automated notification system, and low-code workflow modules.
- Utilized technologies including React.js, JavaScript, PHP, MySQL, HTML/CSS, AI-OCR tessarct.js, and blockchain for audit trails.

Chatbot Assistant

📅 01/2025   📍 University

Summary

- Designed a chatbot to assist users with a variety of tasks.
- Powered by Python and integrated with multiple APIs to provide quick, reliable, and accurate responses.
- Equipped with natural language processing capabilities and a growing knowledge base, making it useful and adaptable.

YAZMO E-Commerce Store

📅 04/2023   📍 University

Summary

- Redesigned an innovative and fully functional e-commerce platform to enhance online shopping experience.
- Focused on style, diversity, and convenience to meet customer needs.
- Provided everything users need to shop for the latest fashion trends.
- Ensured a user-friendly experience through modern technology and creative design.

Multi-Category Quiz App with Real-Time

📅 01/2023   📍 University

Summary

- Developed a dynamic Flutter-based mobile quiz application that delivers an engaging, interactive experience across multiple categories—coding, English, and math.
- Enabled users to test their knowledge and challenge themselves with a timed quiz format, adding excitement and urgency to the learning process.
- Implemented real-time feedback for answers, a countdown timer for each question, and seamless navigation to enhance the overall user experience.
