

Salah Al-Jardali

SOFTWARE ENGINEER

ABOUT ME

I am a driven and ambitious young man; always looking between the lines for opportunities, for development. Focused on building my career in computer programming; specifically backend programming. In my spare time, I love reading about history. I take good care of my body with a healthy diet and by running.

EXPERIENCE

Database project For A Cat Pet Shop *Dec 2024- Feb 2025*
Lebanese University | Hadath, Beirut

- I led a project including two other classmates where I used **power designer** to design an ER diagram for "Tommy": a cat pet shop system. As a team, we coded various Triggers, functions and procedures to test our inserted data and our DDL using **SQLSMS**.

Database Library Managment Project *2025- present*
Pulic Library Saida | Municipality in Saida

- Titled "Rich Tapestry" is a solo project that is focused on creating a database for a diverse library with many categories. The project involves heavy research to determine the appropriate database schema required to produce an efficient and reliable book search engine for readers and their diverse interests; using **PowerDesigner tool** and **SQLSMS**.

Reconstruction of Buildings
Offre Joie | Karantina, Beirut

- I volunteered with a French team of volunteers, among other Lebanese volunteers, to help in the reconstruction of destroyed houses in Karantina after the Beirut Explosion in the 4th of August. This experience helped me foster a sense of teamwork towards a common goal.

Kids Activities
Color My Face | Saida

- With **Color My Face**, I volunteered with a group of locals in my city, Saida, to visit shelters in the schools of Saida after the displacement of southern Lebanese and refugees in the war between Israel and Lebanon in the end of 2024. We made sandwiches and distributed them to families. We played and danced with children and gave them colors!
