Beirut, Beirut, Lebanon

Backend developer specializing in ASP.NET Core/MVC and .NET with experience building secure and scalable web applications. Skilled in API development and database optimization, with additional exposure to Node.js.

Work Experience

Full-stack developer
Vanrise | Hazmieh

Mar 2025 - May 2025

Worked as a full stack intern with a strong focus on the backend, where I built a complete reservation system using ASP.NET MVC, WebAPI, and SQL Server. I designed and developed client and device management pages, integrated backend logic with Entity Framework and stored procedures, and implemented secure login with SHA256 hashing.

Projects

Reservation System | ASP.NET MVC, WebAPI, SQL Server
Present

Developed during my internship, this project managed clients, devices, phone numbers, and reservations.

- Built backend logic with ASP.NET MVC/WebAPI and integrated Entity Framework + Stored Procedures
- Implemented secure login with SHA256 hashing and system-wide validation
- Delivered reporting features and data filtering tools for real business use

E-commerce Platform | Next.js and Mongodb
Present

A full-stack online store simulation with authentication, payments, and admin tools.

- Designed REST APIs in Node.js and secured user auth with JWT
- Integrated payment gateway and developed an admin dashboard for inventory management
- Optimized backend queries to improve performance and UX

Bookshop Web Application | PHP, MySQL
Present

An online bookstore with admin CRUD operations, shopping cart, and order management.

- Built backend workflows for authentication, product listings, and purchase tracking
- Designed a modular database schema to support scalability and easy maintenance

Core Skills

ASP.NET Core, C#, SQL Server, API Development , Entity Framework , Authentication , Node.js

Education

University Of Balamand
Sep 2021 - Jun 2024

Bachelor's in science Computer science

Languages

English *(Fluent)*, **Arabic** *(Fluent)*, **German** *(Fluent)*

Certificates

Back-End Development with .NET
Microsoft

Fullstack development
Techilarious

Interests

Chess, Coding
