PROJECTS

MOBILE E-COMMERCE PLATFORM

- Improved user experience with responsive product catalog, advanced search, and filtering.
- Built a secure ordering workflow and admin dashboard for product management and order tracking.
- Delivered a scalable solution supporting dynamic content and simplified updates for administrators.

MCQ QUIZ WEB APP

- Enabled students to take timed quizzes with instant results and track historical grades.
- Developed professor dashboard to create/manage quizzes, automate grading, and view performance analytics.
- Implemented secure role-based access for students and professors.

CONTACT MANAGER (JAVA DESKTOP APP)

- Designed CRUD functionality for contacts and groups, including grouping and member management.
- Improved usability with quick search, sorting, and structured address book features.
- Delivered an intuitive solution that streamlined organization and reduced manual effort.

TRAVEL AGENCY (JAVA DESKTOP APP)

- Enabled users to browse or create trips, place orders, pay with loyalty points, and view past bookings.
- Built an agent dashboard to create, edit, and manage trips while tracking user orders.
- Implemented a built-in chat system for real-time communication between users and agents.

EXPERIENCE
