Experience

Senior Project

At University

- A service-providing web platform that connects customers with service providers, enabling profile management, video sharing, appointment booking, payments, and feedback.
- Facilitates seamless interaction between customers and providers, offering search/filter tools, subscription features, and a messaging system for efficient service delivery.
- Built with React (frontend), PHP (backend controllers), MySQL (database), and integrated with Chart.js for analytics.

Portfolio Project

- A personal portfolio website showcasing my skills, projects, and experience in web development.
- Serves as an online presence to demonstrate my technical expertise, design abilities, and completed work to potential employers or clients.
- Built with EJS, JavaScript, Node.js, Express.js, using PostgreSQL for data storage, version-controlled via Git/GitHub, and deployed on Render.

Accountant & Cashier

Al Wady Plast   2021-2025

- handling account reconciliations, preparing monthly financial statements, assisting with budgeting and cash flow forecasting, and following store policies to reduce errors. I also operated a POS system for payments, refunds, and exchanges, and resolved customer issues professionally to ensure good service.
