SUMMARY

Experienced Java Developer in multiple microservices backend systems and API development using Spring Boot.

WORK EXPERIENCE

Software Development Intern, Softwarezz

May 2025 – Jul 2025

- Built a full-stack CRUD app using React and Spring Boot, with mobile number verification via external API.
- Integrated Keycloak and Spring Security for authentication and authorization.
- Developed and maintained backend features using Spring Boot, working on real project tasks and enhancements.
- Cloned and deployed the company's platform using Docker and WSL (Ubuntu).
- Utilized GitHub for version control, code reviews, and collaborative development
- Conducted bug testing and fixing on a real-world telecom system (Te Ways).
- Built and improved RESTful APIs for the company's platform.

Software Development Intern, Areeba

Feb 2025 – Apr 2025

- Developed a Java Spring Boot card management and banking system.
- Built a Library Management Microservice and integrated it with the CMS.
- Worked on the Onboarding Microservice under Verto Project, improving functionality and integration.
- Integrated SonarQube to identify and resolve code issues.
- Managed databases using PostgreSQL.

Personal Project: Online Store API

January 2025 – Feb 2025

- Developed a Java Spring Boot application to manage user accounts, products, and orders.
 - Integrated REST APIs for product listing, cart management, and order processing.
 - Utilized PostgreSQL for database management and implemented JWT for secure user authentication.
 - Ensured the application was optimized for scalability and performance.
 - Built the frontend with JavaFX.
-

EDUCATION

Bachelor of Engineering in Biomedical engineering

2020 - 2024

- Beirut Arab University CGPA: 3.38
-
