PROJECTS

Task Manager API

A lightweight ASP.NET Core Web API application designed to manage tasks and projects efficiently. It demonstrates expertise in backend development, authentication, database design, and RESTful APIs.

"Mayel Sawbna" – Hotel Booking System

This project was developed as part of a PHP course. It allows users to search for hotels, make reservations, and add their personal information. The system simulates a basic hotel booking experience with features such as hotel listings, booking forms, and data handling using PHP and MySQL.

LU Assistant

We are developing a mobile application specifically designed for students at the Lebanese University. The app aims to centralize and simplify access to essential academic and extracurricular information. It provides a unified platform where students can stay updated on courses, events, announcements, and university services, all in one place.
