SUMMARY

Motivated Full Stack Developer with real project experience through academic and freelance work. Quick learner with strong problem-solving skills, focused on building scalable, clean web applications in collaborative environments.

EDUCATION

Bachelor of Science in Computer Science	Sept 2022 –June 2025
Beirut Arab University (BAU), Lebanon	GPA: 3.26 / 4.0

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), Tailwind CSS, Shadcn/UI
Backend: Node.js (Express), REST APIs, Firebase Auth & DB
State Management: React Query, =, Context API
Databases: MongoDB, Firebase Realtime DB, PostgreSQL
Tools: Git, GitHub, Vercel, GitHub Actions, Postman, VS Code
Others: Role-based access, server/client-side printing, invoice generation, analytics

PROJECTS

- **Estishara (Senior Project – Medical Platform)**

A complete healthcare consultation platform built from scratch for clinics in underserved regions in Lebanon.
Technologies: Next.js, Tailwind CSS, Firebase, MongoDB, Node.js, GitHub Actions, PayTabs

Key Features:
- Role-based login for Admins, Doctors, and Patients
- Brevo API to send emails automatically through backend (used in OTP and forget password management)
- Gemini AI API for a chatbot that answers only medical questions and recommends doctors suitable for the patient's illness
- Appointment system with automated booking and availability tracking
- Push notifications for doctors via Firebase Cloud Messaging

- Online payments using PayTabs with secure backend handling
- Admin dashboard with user management, analytics, and reports and the ability to approve real doctors by checking their attachments.
- Full real-time chat system using Firebase Realtime Database
- Deployed on Vercel with CI/CD from GitHub Actions

-Not all routes are implemented in the dashboard(it's a mobile app) view code to see it all
Live Demo: estishara.vercel.app (Login: admin1/admin1)

- **Freelance POS & Inventory System**

An end-to-end shop management system built for a small business to manage products, categories, customers, orders, and analytics.
Technologies: Next.js App Router, Tailwind CSS, Shadcn/UI, React Query, MongoDB

Key Features:
- Authentication with secure access for different roles
- Create/manage products, categories, customers, and orders
- Client- and server-side invoice printing (PDF format and receipt)
- View and filter invoices by date, customer, and status
- Monthly and weekly profit tracking with charts
- Real-time product order tracking over the months
- Fully responsive UI with dashboard layout
- Tested with Postman and deployed on Vercel

Code on Github
