Education

Lebanese University HADATH, LEBANON
B.S. in Computer Science.

Sep 2022 – July 2025

Project Experience

Hotel Management System

- **Developed a full-stack hotel management system** using **PHP Laravel**, featuring a secure and scalable architecture.
- **Implemented an admin panel with full CRUD functionality**, allowing administrators to manage users, bookings, and other resources efficiently.
- **Built a client-side interface** supporting bookings, navigation, and real-time support interactions, enhancing user engagement and experience.

Social Media Replica

- **Developed a full-stack social media replica application** with **React.js** (front-end) and **Node.js + Express + MySQL + Sequelize** (back-end), enabling dynamic user interactions.
- **Implemented secure authentication and authorization** using **JWT**, including **registration, login, logout**, and **role-based access to protected routes**.
- **Built full CRUD functionality for posts and comments**, allowing users to **create, edit, delete, like, and comment** on posts while enforcing permission checks.
- **Integrated front-end and back-end via Axios**, providing real-time data updates and consistent synchronization

Modern Bank App

- **Developed a front-end modern, responsive banking web application** using **React 19** and **Vite**, featuring modular components for navigation, financial statistics, card management, billing, and client interaction.
- **Styled the application with Tailwind CSS**, implementing a clean, responsive, and user-friendly interface optimized for fintech users.
- **Built a component-based architecture** separating UI and logic, improving scalability, maintainability, and development efficiency.

Modern Restaurant App

- **Built a front-end restaurant web application** with **React.js (v17)**, featuring modular, reusable components for key sections (**About Us, Special Menu, Chef's Intro, Gallery, Contact/Find Us, etc.**).
- **Enhanced UI with modern iconography** using **React Icons**, creating a professional and visually engaging interface.
- **Styled the app with custom CSS**, delivering a responsive and user-friendly experience across devices.
- **Implemented a clean project structure** separating **components/** and **container/** directories, improving scalability and maintainability.
