ABOUT ME

I'm a computer science student who works at the intersection of technology, creativity, and collaboration. I focus on solving problems, turning ideas into practical projects, and helping teams deliver clear and effective results.

EDUCATION

USEK-kaslik | 2023-present

computer science undergraduate

Undergoing my university's bachelor's in computer science, currently at my second year at USEK

WORK EXPERIENCE

Sifr Magazine | june 2025 - present

Full Stack Developer | Web Scraping & Package Management

Developed full-stack, storytelling-driven websites with seamless animations and interactive scrollytelling experiences, managing deployment, performance optimization, and automated web-scraping pipelines for content aggregation.

Newbury and Sift Brasserie | sep 2023 - sep 2025

Team Leader

Led a team of five, improving teamwork, productivity, and customer coordination through effective communication and project management.

guitar teacher, math teacher | 2022 - present

Freelance

Provide personalized one-on-one math and guitar lessons for students of all levels, designing tailored lesson plans that strengthen understanding, build confidence, and enhance problem-solving and technical skills through a supportive, structured approach.

SKILLS

- communication
- team leadership
- web scraping
- react.js (basic)
- problem solving
