Professional Summary

Software Developer with a strong background in PHP, .NET and React . Strong foundation in **algorithms, data structures, and software design principles**. Adept at problem-solving, debugging, and collaborating in agile environments.

.NET Intern

July 2024-Sep.2024

IDS

- Developed a full-stack Activity Club website using React for the frontend and .NET for the backend.
 - Utilized two separate **React templates**: one for admin functionalities and another for **public users**.
 - Implemented backend services to manage **guides, events, members**, and other related entities.
 - Enabled public users to join upcoming events, with the admin having the ability to **approve or reject** event participation.
 - Developed user profile management features for both public users and admins.
 - Integrated frontend and backend seamlessly to ensure smooth operations and real-time data management.

Projects
