Professional Summary

SeFactory Software Engineer alumna, with a passion for problem-solving and a proven track record in front-end optimization and back-end development. Interested in leveraging my passion for problem solving and full stack development to build innovative software solutions.

Skills

Languages: Python, Java, JavaScript, PHP, HTML, CSS, SQL

Stacks: ReactJs, React Native, NodeJs, NestJs, Laravel, N8N, MongoDb

Tools: Figma, GitHub, BrowserStack, Trello, WordPress, Elementor, Breakdance, Bootstrap

Experience

Front-end Web Developer, PearlBrands — June 2022 – Jul 2024

- Conducted UI/UX testing to optimize functionality and user experience, utilizing tools such as BrowserStack for cross-browser compatibility and Trello for tracking and managing testing processes.
- Managed product publishing on WordPress, ensuring high attention to detail.
- Developed and implemented home, shop, and product pages using Breakdance, Elementor, CSS, and JavaScript.
- Improved page load speed by 30% through visuals and CSS optimizations.

Full Stack Website Development Intern, Let's Grant — June 2020 – Sep 2020

- Proficient in front-end (HTML, CSS, JavaScript, frameworks) and back-end (Node.js, Express.js, MongoDB) for web application development and deployment.
- Experienced in designing scalable web application architectures and strategic technology selection for diverse product lines.
- Ensured code quality via testing and Git, and deliver 45+ web applications and landing pages.

Projects

IntelliRoom — IntelliRoom

- Developed a React Native and NestJS application where the user can upload a room, and using the ML model, the application generates suggestions to elevate the space.

Snackies — snackies-project

- Collaborated on a team to develop a full stack e-Commerce platform, where I was responsible for building the chat-bot AI agent. Contributed also to back-end and front-end development using Laravel, ReactJS, and N8N.

Education

Lebanese American University, BS in Computer Science — 2017 – 2022

Certificates

Foundations of Computer Science FCS, SEFactory — Feb 2025 – Apr 2025

- Deepened my practical expertise in Python, covering Data structure and algorithms.
- Provided hands-on experience with web development (HTML, CSS, JavaScript, PHP, SQL).
- Refined problem solving skills and applied theoretical knowledge to practical projects.

Full-Stack Software Engineer FSE , SEFactory — June - September 2025

- Completed a 12-week software engineering bootcamp, mastering core concepts including Software Development Life Cycle, SOLID Principles, writing clean code and Design Patterns..
- Gained practical experience with modern web/mobile frameworks (Laravel, React, React Native, MERN stack), advanced SQL and database topics, dependency management, UI/UX design, cloud deployment on AWS.
