JavaScript, TypeScript,
ReactJs, NodeJs, VueJs

EXPERIENCE

Frontend Developer — At-visions

April 2025 - PRESENT

- Built and maintained responsive landing pages and new product features using Vue 3, TypeScript, Pinia, and Tailwind CSS.
- Implemented i18n localization for multilingual support across the platform.
- Added robust form validations and improved error-handling flows for better user experience.
- Wrote unit tests using Vitest to ensure reliability and maintainability of key components.
- Collaborated closely with UX/UI teams to refine layouts and enhance mobile performance.
- Participated in code reviews, optimized performance, and supported CI/CD workflows.

Senior Frontend Developer (Freelance) — Marble Market, XVision Tech

March 2025 - PRESENT

- Led the development of the project from start to finish, taking full ownership of the front end.
- Developed *Marble Market*, a React + TypeScript + Vite marketplace from scratch.
- Implemented **PWA (Progressive Web App)** features for offline access and improved loading speed.
- Integrated **i18n translations** for full bilingual support (English / Arabic).
- Built responsive, mobile-first layouts ensuring an optimal user experience on all devices.
- Used **Redux** for state management and **MUI** for a consistent, modern UI design.
- Set up and maintained **Azure CI/CD pipelines** for smooth deployments.
- Focused on performance optimization, reusable components, and accessibility compliance.

Senior Frontend Developer (Freelance) — Co Team

November 2024 - January 2025

- Led the development of the Co Team project from start to finish, taking full ownership of the front end.
- Utilized React (JavaScript) and React Redux tools to build a scalable and maintainable architecture.
- Integrated Azure DevOps for CI/CD and implemented pipelines to automate builds and deployments.
- Ensured optimized performance and responsive UI while maintaining best coding practices.
- Worked closely with backend teams and stakeholders to deliver a seamless user experience.

Senior Software Developer — Lokalee

November 2021 - March 2025

- Designed and developed an AI-based hospitality app using React.js and Node.js, aimed at providing 24/7 support to leisure and business travelers, as well as local residents.
- Developed an AI-based hospitality web app using **React.js** and **Node.js**, serving travelers and residents 24/7.
- Integrated **Node.js APIs** with React.js modules for seamless front- and back-end communication.
- Built **50+ reusable, responsive UI components** to enhance scalability and maintainability.
- Implemented **centralized state management** and real-time data synchronization.

- Reviewed code, mentored junior developers, and promoted best practices across the front-end team.
- Optimized performance, debugging workflows, and mobile responsiveness for a smoother UX.
- Contributed to **front-end architecture design** and introduced UI concepts adopted across multiple projects.

Software Developer — Massyve.tech

August 2021 - October 2021

Massyve technologies serve businesses, startups, and entrepreneurs all over the world.

- Worked with a team to create an application that reached the top 100 in the App Store.
- Built a backend API for data storage using Node.js and Express framework. Developed front-end user interface using React Native and JavaScript for iOS and Android applications.
- Utilized React Native debugging tools to identify and fix bugs
- Successfully implemented features such as push notifications and social media login.

Software Developer — Life Code

January 2019 - February 2021

MedGira Application - created a medical tourism platform from scratch (using NodeJS, MongoDB, AngularJS, Hooks, Sass) covering 10+ countries with multiple payments. gateways and Google Calendar Integration to connect doctors to clients offering hosting services and flight reservation support.

EDUCATION

Lebanese University, Bachelor of Science in Computer and Communication Engineering.

June 2018 - September 2021

Focus on Computer Software Engineering.

Cisco and Park Innovation, FullStack Coding Bootcamp (320 hours)

June 2018 - December 2020

CyberSecurity essentials (80 hours)

- Covered **JavaScript, Node.js, React.js, Redux, Kotlin, and Java** across web and mobile development.
- Built a **multi-tier app** integrating a non-relational database with web and mobile front-ends.
- Completed **Cybersecurity Essentials (80 hrs)** and full-stack theory (260 hrs) plus implementation (60 hrs).

Maroun Aboud, High School, Life Sciences

July 2015 - June 2018

LEADERSHIP AND AWARDS

Member, Interact Club Of Aley

June 2018 - September 2021

Participating in 10+ meaningful service projects and events.

Member, AFDC Ramlieh

June 2018 - September 2021

Make decisions as a collective group and hold joint responsibility for decisions and actions taken by the management committee.

Cub, Scouts Youth

June 2018 - September 2021

Engaged in social missions, camping and many other character-building experiences.
