Phone: 76141927

Professional Summary

Laravel Developer with experience in building admin dashboards using Filament and developing reusable Laravel APIs. Projects are available on my GitHub profile. Passionate about writing clean, maintainable code and contributing real value to company projects.

Technical Skills

- PHP / Laravel (Routes, Eloquent, Migrations, Middleware)
- Filament — Building dashboards and admin panels
- RESTful APIs (Endpoints, Authentication, Error handling)
- Git / GitHub (Repository management, Branch workflow)
- Relational Databases (MySQL)
- HTML / CSS / JavaScript (basic integration with interfaces)

Projects & Experience

- Developed personal projects hosted on GitHub — CRUD systems, APIs, and admin panels using Filament.
- Designed scalable API structures with authentication and role-based access.
- Enhanced admin dashboards to improve efficiency of content management tasks.

Certifications

- TS2 Administrative Information Technology
- LT Software Informatics

Key Strengths

- Strong focus on clean, organized, and maintainable code.
- Continuous learner, staying updated with best practices in web development.
- Flexible and ready to contribute within collaborative team environments.

Career Objective

I am passionate about work and eager to add value to the company through practical solutions that improve performance and team efficiency.
