Expected Graduation: 2026

Sana'a Toufic Hamieh

Pentester Intern

SUMMARY

Passionate and detail-oriented cybersecurity student specializing in penetration testing and ethical hacking. Skilled in identifying, analyzing, and resolving security vulnerabilities in systems and web applications. Adept with Linux, OWASP methodologies, and hands-on lab simulations. Eager to apply technical knowledge in a real-world environment and contribute to strengthening cybersecurity defenses.

PROJECTS

Vulnerability Scanner Tool

Python | Nmap | OWASP

Developed a custom Python-based tool to scan web applications for common vulnerabilities such as SQL injection, XSS, and misconfigurations.

Web Application Security Lab

Burp Suite | Kali Linux

Performed penetration testing on intentionally vulnerable web apps (DVWA, OWASP Juice Shop) and documented exploits and fixes.

Network Security Simulation

Wireshark | Cisco Packet Tracer

Simulated and analyzed different network attacks and packet behaviors using Wireshark to understand intrusion detection techniques.

WORK & INTERNSHIPS

Cybersecurity Intern (Training)

Remote | 2025

Assisted in vulnerability assessments, basic network security auditing, and participated in Capture The Flag

COURSES

Introduction to DarkWeb,
Anonymity &
Cryptocurrency - EC-
Council
What is Generative AI -
LinkedIn Learning
Ethical Hacking Essentials -
EC-Council

(CTF) challenges to strengthen technical expertise.
