## Summary

Backend-Focused Full Stack Developer with 4+ years of experience in backend architecture and REST APIs. Skilled in frontend frameworks, mentoring, and delivering scalable, maintainable solutions.

## Skills

**Backend:** Laravel, PHP, Node.js, Express.js

**Frontend:** React, JavaScript, HTML5/CSS3

**Databases:** MySQL, MongoDB

**Tools:** AWS, Firebase, Postman, Git, Cloudflare, Jira, Trello, Slack, Sentry

## Experience

### Web Development Instructor – CIS College

July 2025 – Present

- Deliver structured training in HTML, CSS, JavaScript, SQL, and more with project-based learning.
- Mentor students through hands-on projects and code reviews, enhancing problem-solving

### Backend Developer – Creoshift

March 2023 – Present

- Built and optimized scalable Laravel APIs using clean architectural patterns, caching (Redis), and performance profiling tools, improving response time by 25%.
- Designed, normalized, and optimized MySQL databases with proper indexing and query optimization, while leveraging Eloquent ORM to prevent N+1 queries and improve data-access performance.
- Implemented scalability solutions such as caching layers, efficient eager-loading strategies, and optimized query structures to support high-traffic environments.
- Translated business requirements into clear technical specifications and scalable system architectures.
- Applied structured problem-solving techniques (root-cause analysis, performance profiling, load testing) to identify bottlenecks and deliver stable, high-performance solutions.
- Mentored junior developers, performed detailed code reviews, and guided team members through debugging, refactoring, and performance tuning.

### Full Stack Developer – Pixel38

October 2020 – March 2023

- Developed and maintained reliable, scalable backend services using Laravel.
- Improved platform stability by resolving technical issues and optimizing performance.
- Integrated third-party platforms like WordPress and Shopify, promoting best practices for efficiency

### R&D Engineer – Celitech

April 2020 – August 2020

- Developed and optimized REST APIs using Serverless and TypeORM for scalability.
- Enhanced user interfaces with React and Material-UI for better usability.
- Performed unit testing and generated OpenAPI documentation for seamless integrations.

## Education

### Full Stack Development Bootcamp – Codi Tech

April 2019 – November 2019

### BE in Communications & Electronics Engineering – Beirut Arab University

2013 – 2018

## Languages

English / Arabic
