SUMMARY

A dedicated and results-oriented professional with a strong background in web development and IT. Armed with comprehensive knowledge and practice in the DevOps field. Possessing skills in automation, collaboration, and system administration. My proficiency in web development, coupled with a passion for continuous learning, positions me as a motivated candidate ready to embrace the complexities of DevOps and make meaningful contributions to streamline development processes and enhance overall system efficiency.

TECHNICAL SKILLS

Programming Languages: JavaScript (Node.js, React.js) (Advanced), Python (Intermediate), PHP (Advanced) , SQL (Intermediate), HTML (Advanced), CSS (Advanced), Java (Intermediate)

Frameworks & Libraries: Express.js (Intermediate), Tailwind CSS (Advanced) , Laravel (Intermediate), Spring Boot (Beginner)

Tools & Platforms: Git (Intermediate), Docker (Intermediate), Firebase (Beginner) , phpMyAdmin (Intermediate), MongoDB (Intermediate), MySQL (Intermediate), Rest API(Advanced) , Postman (Advanced)

DevOps & System Tools: CI/CD (Intermediate), Nginx (Intermediate), Webhooks (Intermediate), Vite (Intermediate)

Cloud & Hosting: Google Firebase (Intermediate), Netlify (Intermediate)

Other Technical Areas: OAuth (Intermediate), JWT auth (Beginner)

PROJECTS

Educational website   June 2025 – Present
React.js, Node.js, REST API, Tailwind CSS, SQL

- Developed an end-to-end system for Education and Guiding in Business
- Managed UX/UI Development
- Achieved an award for a new idea in a market

Digital Wallet   May 2025 – Jun 2025
PHP, HTML, CSS, JS, SQL

- Built a Website that user can deposit, withdraw, View Transactions and download transaction history
- Managed responsiveness for UX/UI integration

Movie Hub – Streaming Platform   March 2025 – May 2025
React, Node , Tailwind , Express, SQL

- Developed a dynamic, responsive frontend with React for an engaging user experience.
- Utilized Clerk for secure user authentication and management.
- Utilized Clerk for secure user authentication and management.
- Created a robust backend server with Node.js and Express to handle movie data, user interactions, and API integrations.

Liability Manager Website   Jul 2024 – Nov 2024
React, Node , Tailwind , Express, SQL

- Designed and implemented backend logic and database structure to efficiently track and manage liabilities.
- Built an intuitive and responsive frontend interface for seamless user experience.
- Implemented OAuth for secure user authentication and authorization.
- Ensured the security, scalability, and maintainability of the website.

EXPERIENCE

Freelance Web Developer   June 2018 – Present

- Delivered over 30+ custom web applications, including e-commerce, dashboards, and CMS platforms, for clients across North America and MENA region.
- Developed and deployed a Java-based RESTful API using Spring Boot for a logistics tracking dashboard, handling 1,000+ daily requests with JWT-based authentication.
- Managed projects from concept to deployment, reducing average development time by 25% through streamlined workflows.
- an average client satisfaction rating of 95%, and generated 80% repeat business.
- Provided ongoing support and maintenance, reducing client-reported issues by 60% over time.
- Integrated Java backends with front-end interfaces (React) to create seamless, secure web experiences.

Software Developer   Nov 2024 – April 2025
Netrevenue.io   *Toronto, Canada*

- Built secure OAuth flows and webhook listeners handling over 10,000+ real-time payment events/month using Node.js and Express.
- Integrated Firebase Authentication, resulting in a 30% increase in security compliance and 20% faster login time.
- Collaborated with 3+ cross-functional teams, contributing to an 18% improvement in deployment efficiency.
- Wrote and maintained over 15,000 lines of production code, with 98% test coverage.
- Resolved 90% of critical bugs within 24 hours, significantly reducing downtime.

Software Developer   Feb 2024 – Nov 2024
ISS Software Hive   *Rawshe, Lebanon*

- Developed and maintained 5+ scalable full-stack web applications using React, Node.js, and SSMS , serving over 5,000 users.
- Improved backend performance by 40% by optimizing database queries and implementing caching.
- Enhanced CI/CD pipeline, reducing deployment time by 35% and increasing build reliability.
- Worked closely with QA and design teams, helping reduce UAT bugs by 25%.
- Contributed to a DevOps transformation initiative, achieving 100% on-time delivery for key project milestones.

EDUCATION

CNAM De Liban   Baakiline, Lebanon
B.S in Computer Science   *Aug 2022 – June 2025*

CERTIFICATIONS

- DevOps Certification, Park Innovation, Lebanon
- META Introduction to Front-End Development, Coursera
- Full Stack Development Certification, Park Innovation, Lebanon
- JavaScript Bootcamp, Park Innovation, Lebanon
