Summary

Junior computer scientist with hands-on experience in .NET development, mobile development using .NET MAUI, and full-stack systems. Completed a practical internship delivering an authentication-based mobile app with CRUD features and invoice management.

Education

Lebanese University, Faculty of Science

Bachelor of Science – Computer Science

2021–2025

Experience

Sana Company

Tripoli, Lebanon

Software Development Intern, **Technologies:** C#, .NET MAUI, SQL Server, REST APIs

2024

- Built a functional mobile application using .NET MAUI with admin/user authentication.
- Admin features: **Categories, Customers, Products CRUD**, invoice review, invoice items.
- User features: customer selection, product selection, order creation, invoice generation with total.
- Worked on UI design, validation, API integration, and state handling.

Projects

CashVan Mobile App – .NET MAUI: Mobile application with login roles, CRUD operations, order workflow, invoice total calculation, and invoice reviewing. Built using C#, .NET MAUI, and SQL Server during internship.

E-commerce System API – ASP.NET Core 8: Backend system using Minimal APIs and EF Core with Services Layer, implementing CRUD for Products and Categories. Integrated SQL Server and clean architecture.

Skills

C#, Java, C, PHP | .NET, ASP.NET Core, .NET MAUI | SQL Server | Git/GitHub | Figma | UNIX Scripting | Networking | Problem Solving | Teamwork | Communication | Time Management
