Experience

- **Backend Developer Internship at ISS software Hive (Oct 13 – Dec 7)**
  Learned to design and manage databases, enforce data integrity, perform CRUD operations, and integrate backend systems securely.

- **Full Stack Developer internship at IDS Solutions (June 1 – July 31)**
  Completed a Full Stack Developer internship at IDS Solutions, PHP (Laravel) and MySQL, Restful APIs to build and maintain web applications

- **Beauty Advisor at Faces (Socodile Holding) (Sep 25 – Nov 31)**
  Worked as a beauty advisor at Faces, providing personalized skincare, cosmetics and perfumes recommendations while actively selling products to meet customer needs and drive sales.

- **Front Desk at Hotel Saint George (Summer job from May 1 , 2024 - August 31, 2024)**
  Managed check-in/ checkout , handled reservations and calls , assisted guests and processed cash payments accurately .

Projects

- **Curl**
  As part of the Design and Social Impact course, we created a website for a coffee/bookshop in Badaro, Lebanon. Working alongside graphic designers, we developed a unique and playful design enriched with custom illustrations. While visually engaging, the website remains user-friendly, ensuring effortless navigation.

  Skills: HTML / CSS / JavaScript / Bootstrap / Figma (Software) / GitHub / Git BASH

- **Smart Meeting Room & Meeting Management**
  Developed a Smart Meeting Room & Minutes Management System that allows users to manage rooms, schedule meetings, and record minutes with assigned action items. Implemented features like user roles, booking management, calendar views, and automated PDF summaries to streamline meeting organization and tracking.

  Skills: Full Stack Development (Laravel/ PHP, MySQL) / Role-based access control and booking system implementation PDF generation, calendar integration, and meeting management

- **Course File Archiving System (Final Year Project)**
  Developed a Course-File Archiving System for academic institutions with role-based access, secure file upload, search, metadata tagging, user activity logging, and an integrated AI chatbot (Gemini API). Built using PHP, MySQL, HTML, CSS, JavaScript, and AJAX. Collaborated with teammates to design and implement the system

  Skills: Bootstrap and Java
