Professional Summary

Dedicated and innovative digital official with education technologies and early childhood education knowledge. More than four years of experience integrating technology in learning environments to inspire creativity and fine-tune teaching strategies. Proven record in leading STEAM programs, training teachers on technology tools, creating attractive digital content for young learners, and experience working in different cultural contexts. Well caught up in the ever-changing digital education methodologies.

Top Strengths:

- Fine-tuned to use new technologies to increase learning and improve classroom 'productivity', such as gamification and AI-powered tools.
- Developing strategies for interdisciplinary learning, involving creativity and critical thinking, and nurturing a passion for discovery in young learners.
- Experienced in working with teachers on the use of technology to enhance learning and, in the long run, build a professional learning community.

Experience

Content Writer (Contract), Pedagogy SARL – Tripoli, Lebanon, July 2025 – Present

- Create engaging content for online training courses tailored to teachers and school coordinators.
- Design instructional PowerPoint presentations, posters, and animated slides for educational delivery.
- Write video scripts for educator-led sessions and oversee the visual storytelling process.
- Contribute to developing impactful digital learning experiences aligned with pedagogical goals.

Digital and Logistics Officer, Dent de Lait Future Kids Nursery – Beirut, Lebanon, September 2024 – Present

- Leading the basic integration within the kindergarten classroom of educational technology tools to improve digital literacy and ultimately learning outcomes.
- Innovatively designing and implementing digital programs for early childhood being fully supportive of blending traditional and modern teaching practices.
- Organizing the STEAM program for children aged 1-4 and trained teachers to be able to teach effectively in fun, interactive engaging lessons.
- Mentoring teaching staff on how to adopt digital solutions for improved use of technology during lesson preparation and delivery.
- Building logistical systems for the running of the daily business seamlessly and with high transparency across workflows.
- Developing digital logistics systems to streamline administrative tasks, improving operational efficiency by 20%.

Kindergarten Teacher (KG1), Dent de Lait Future Kids Nursery – Beirut, Lebanon, 2022 – 2024

- Designed and delivered essential lessons that enhanced fundamental skills and encouraged the young minds' creativity as well as curiosity.
- Implemented methods for learning enjoyment, resulting in maximum student engagement.
- Participated actively in the school's events, working for their flawless execution and success through innovation and teamwork.
- Carried out periodic assessment tests and analyzed progress against the standards to decide teaching modifications.
- Engaged in partnership with parents to develop a cohesive approach to child development and learning.

Preschool Teacher, Dent de Lait Future Kids Nursery – Beirut, Lebanon, 2021 – 2022

- Planned and executed the age-appropriate activity for toddlers from 2-3 years, keeping in mind their emotional and cognitive development.
- Incorporated digital tools to run interactive storytelling sessions, leading to remarkable improvement in attention span and comprehension.
- Established an emotionally and intellectually supportive environment for learning, marked by inquisitiveness and exploration.
