Education

Bachelor's Degree in Computer and Communication Engineering   May 2020
Notre Dame University - Lebanon

Skills

- Java
- Spring Boot
- Seeburger
- HTML
- CSS
- Angular13
- Typescript
- OOP
- Data Structures
- SQL
- Docker
- Ansible
- Linux
- Computer Networking
- Agile Methodology

Language

- Arabic: Native
- English: Fluent
- French: Intermediate
- German: Intermediate

Experience

Java Developer   Jan 2024 – Present
AirPlus International - Neu-Isenburg, Germany

- Collaborated with cross-functional teams including project managers, business stakeholders, senior developers, and QA engineers to gather requirements, define project objectives, and deliver high-quality, production-ready features.
- Contributed to all phases of the software development lifecycle, from planning and implementation to testing, deployment, and post-release support following industry best practices.
- Supported DevOps initiatives by configuring environments and implementing CI/CD pipelines using Ansible, helping streamline and automate deployment workflows.
- Authored and maintained clear technical documentation for codebases, processes, and configurations to support team knowledge sharing and efficient onboarding.

Associate Application Developer   Apr 2022 - Dec 2023
Infosys Ltd. - Düsseldorf, Germany

- Designed and developed a full-stack web application using Angular and Spring Boot, deploying on Azure with Docker containers to ensure scalability, optimized resource usage, and modern, high-performance user experience.
- Implemented modern development workflows, including cloud deployment and CI/CD pipelines, to deliver reliable, maintainable, and high-quality software solutions.
- Enhanced monitoring strategies by refining alert thresholds and configurations; responded to incidents, performed root cause analysis, and contributed to post-incident reviews to improve system reliability resulting in more stable application releases.
- Collaborated with team members to ensure code quality through code reviews, bug resolution, and effective cross-functional communication.

Project Intern   Jun 2019 - Jul 2019
Saradar Bank S.A.L - Beirut, Lebanon

- Enhanced the CI/CD implementation by enforcing container security steps throughout the build pipeline.
- Drove the implementation of an Intrusion Detection System (IDS) across the local network.
- Operated the IDS and organized the actions required based on the logs generated.
- Amplified the log analysis capabilities of the security team by integrating the IDS with a SIEM solution.

Volunteer Coordinator and Trainer   Jan 2017- Jun 2019
International Education Association - Beirut, Lebanon

- Taught students and school teachers of all ages how to use and program the Raspberry Pi using Python.
- Responsible for communications with the volunteers in the program.
- Collected, managed, and kept track of the data of each volunteer who joined the program.
- Communicated and coordinated with academic heads of departments, mentors, and partners involved in helping the program.

Infosys Certificates

- Angular Professional
- Spring Professional
- Spring Microservices Developer
- Java SE8 Developer
